

I am a private citizen asking the FCC to reject the NAB's petition 04-160. I PAY Satellite Radio for the services it provides including traffic and weather updates. This is a choice I have made as a free citizen in this nation. To squash capitalism erodes the foundation of this country. I ask the FCC to consider motives of the NAB(they just don't want or can't compete with this wonderful service). Please reject this petition and support capitalism and our way of life.
